SUMMARY

Detail-oriented graduate with hands-on experience in data validation, reporting, and process documentation, seeking to bring these skills to a role. Adept at building dashboards for leadership review, maintaining accurate documentation, and identifying opportunities to improve process efficiency with strong written and verbal communication and a collaborative, cross-functional working style.

SKILLS

Reporting & Dashboards: Power BI, Tableau, and Advanced Excel: building KPI scorecards and dashboards for stakeholder review

Documentation & Quality: Process documentation, audit support, data validation, reconciliation, ticketing

Business Tools: CRM systems (Salesforce), Master Data Management, SQL/MySQL, data extraction

Communication: Cross-functional collaboration, presenting insights to review panels, stakeholder coordination

Additional Technical: Python, Scikit-learn, Pandas (supporting data-analysis projects)

RELEVANT PROJECTS

Customer Purchase Behavior Analytics

SQL, Python, Power BI

- Built an automated reporting dashboard to extract and process transaction data, saving 10 hours of manual reporting effort weekly directly comparable to preparing recurring reports/dashboards for client teams.
- Designed performance scorecards in Power BI to track KPIs and visualize trends for review by stakeholders.
- Improved data validation procedures for customer records, reducing processing errors by 30%, reflecting a proactive approach to improving process quality and productivity.
- Presented structured business insights to cross-functional reviewers, translating data analysis into clear, actionable recommendations.

Loan Default Risk Prediction

Python, SQL, Pandas

- Validated and maintained financial datasets of 50,000+ records, ensuring high data integrity for MIS-style reporting.
- Assisted in audit and reconciliation of database entries to maintain accurate records similar to reviewing working papers and client folders.
- Completed regular compliance and validation checks on financial data, supporting accuracy and audit-readiness.

AI-Powered Attendance Tracking System

Python, OpenCV, SQL

- Created comprehensive process documentation and operational logs to support smooth project transitions and knowledge sharing across the team.
- Managed structured, normalized data for 1,000+ records, applying database best practices.
- Implemented validation checks that reduced data discrepancies by 15%, improving system reliability.

EDUCATION

B. Tech – Electronics and Communication Engineering

Oct 2021 – Sep 2025

SASTRA Deemed University, Thanjavur, Tamil Nadu

CERTIFICATIONS

- Simplilearn Certified: Introduction to MS Excel
- Scaler Certified: SQL & Database Design with MySQL
