Summary

Motivated and detail-oriented Engineering graduate with strong analytical, problem-solving, and programming skills. Familiar with software development, database management, object-oriented programming, and agile development methodologies. Passionate about enterprise application development and eager to contribute to SAP-based solutions. Quick learner with the ability to adapt to new technologies and collaborate effectively in team environments.

Technical Skills

SAP & Enterprise Technologies:	SAP ABAP on HANA, SAP Fiori, SAP UI5, Enterprise Application Development
SAP Development:	Data Dictionary, Internal Tables, Function Modules, ALV Reports
Programming Languages:	Python, Java, SQL, JavaScript
Database Technologies:	Database Management, Data Modeling, MySQL, PostgreSQL
Software Development:	Agile Methodologies, Software Development Lifecycle (SDLC), OOP, Debugging
Web Technologies:	HTML5, CSS3, Responsive Design
Tools:	Git/GitHub, VS Code, Jupyter Notebook

Projects

Employee Management System using SAP ABAP

- Developed an end-to-end Employee Management and Payroll System leveraging SAP ABAP.
- Created modular ABAP programs utilizing internal tables and reusable functions to streamline payroll workflows.
- Automated payroll calculation logic supporting 500+ employees, resulting in a improving payroll processing efficiency.
- Optimized reporting processes to generate workforce analytics, saving 5 hours of manual data entry weekly.
- Implemented data validation logic to ensure accuracy in employee records and payroll calculations.
- Developed custom software components and reports based on business requirements and technical specifications.

Vendor Management System (SAP HANA)

- Developed a Vendor Management System using SAP ABAP to centralize vendor master data and procurement records.
- Designed modular ABAP programs utilizing internal tables and function modules to enhance code reusability.
- Implemented robust registration, search, and filtering features with automated data validation, reducing entry errors.
- Created procurement analysis reports that provided actionable business insights for vendor performance evaluations.
- Performed rigorous debugging and code optimization for SAP HANA database queries, improving application performance metrics by 15%.
- Collaborated in requirement analysis, testing, and troubleshooting activities to ensure reliable SAP ABAP application performance.

Customer Purchase Behavior Analytics

- Analyzed transaction records using SQL for efficient data aggregation and trend discovery.
- Scripted automated data processing workflows using Python, resulting in a 30% reduction in manual data handling time.
- Developed interactive dashboards to visualize key performance indicators (KPI) and emerging product demand patterns.
- Improved data reliability through systematic data cleaning and outlier detection, increasing overall data accuracy by 12%.
- Designed scalable data modeling structures to effectively map and visualize customer transaction trends.

EDUCATION

SASTRA Deemed University | Bachelor of Technology in Electronics and Communication Engineering
Thanjavur, Tamil Nadu

CGPA: 7.5
