

VAJRALA GEETHIKA

✉ vajralageethika8@gmail.com ☎ +91 9618176143 📍 Hyderabad, Telangana 🌐 GitHub

Summary

Analytical and detail-oriented graduate with strong skills in SQL, Excel, Python, and data analysis. Experienced in data validation, quality checks, process improvement, and identifying patterns through large datasets. Proven ability to follow standard operating procedures (SOPs), maintain documentation, perform root cause analysis, and communicate findings effectively with stakeholders. Adept at working in fast-paced environments while meeting quality and productivity targets.

Technical Skills

Data Analysis & Quality:	Data Validation, Data Auditing, Data Cleaning, Root Cause Analysis, Quality Assurance, Process Improvement, Exception Handling
Programming:	Python (Advanced), Pandas, NumPy
Databases:	SQL (PostgreSQL, MySQL)
Reporting & Visualization:	Power BI, Advanced Excel (Pivot Tables, VLOOKUP, Data Validation), Matplotlib, Seaborn
Tools & Concepts:	ETL Pipelines, Documentation, Workflow Tracking, SOP Compliance, Data Modeling, Git/GitHub, Jupyter Notebook, VS Code

PROJECTS

Customer Purchase Behavior Analytics

SQL, Python, Power BI

- Analyzed 3,000+ transaction records using Optimized SQL Queries for complex data aggregations and trend discovery.
- Automated routine reporting tasks via Python Scripting, resulting in a 30% reduction in manual data processing time (10 hours/week).
- Architected interactive Power BI dashboards to track critical KPIs and product demand patterns, enhancing stakeholder decision-making speed.
- Improved data reliability for downstream modeling by 15% through systematic data cleaning and outlier detection.
- Conducted quality audits and validation of transactional datasets to improve reporting accuracy and maintain data integrity.

AI-Powered Computer Vision Attendance System

Python, OpenCV, SQL

- Engineered an automated face-recognition system using OpenCV to manage high volume records, increasing logging accuracy by 25%.
- Maintained accurate records and database consistency for 1,000+ student profiles through regular quality verification processes.
- Performed systematic testing, validation, and exception handling to ensure reliable attendance tracking under varying operating conditions.

Loan Default Risk Prediction

Python, Scikit-learn, Pandas

- Performed extensive data validation and quality checks on 50,000+ financial records to ensure data accuracy before model development.
- Applied advanced normalization and feature engineering techniques, improving model sensitivity by 15%.
- Achieved a 0.82 ROC-AUC score through rigorous hyperparameter tuning and cross-validation, significantly reducing potential credit loss.
- Conducted deep-dive statistical analysis to uncover latent borrower repayment patterns and visualize primary risk factors.
- Investigated data anomalies and exceptions through exploratory analysis, identifying key risk patterns and improving decision-making accuracy.

EDUCATION

SASTRA Deemed University | B. Tech - Electronics and Communication Engineering | Oct 2021 - Sep 2025

Thanjavur, Tamil Nadu

CGPA: 7.5/10

CERTIFICATIONS

SQL & Database Design with MySQL:Scaler
