Summary

Detail-oriented professional with a strong foundation in data analysis, SQL, Python, and Advanced Microsoft Excel. Skilled in designing automated reporting solutions, performance scorecards, and data visualization dashboards using Power BI. Proven ability to extract, validate, and analyze data from multiple sources to provide actionable business insights. Collaborative team member committed to enhancing data accuracy and reporting process efficiency in fast-paced environments.

Technical Skills

Databases & Analysis:	SQL, Data Extraction, Data Validation, Statistical Analysis
Programming:	Python, R
Reporting & Visualization:	Power BI, Advanced Excel, Performance Scorecards, Data Dashboards, Tableau
Tools & Concepts:	MS Office (PowerPoint, Word), Git, VS Code, Data Integrity

PROJECTS

Customer Purchase Behavior Analytics

SQL, Python, Power BI

- Developed automated reporting dashboards using Python, saving 10 hours of manual reporting time per week.
- Created and maintained performance scorecards to track critical Key Performance Indicators (KPIs) and customer demand trends.
- Collaborated with business stakeholders to gather specific reporting requirements and define functional dashboard layouts.
- Improved overall data quality by reducing manual processing errors by 30% through the implementation of Python-based validation scripts.
- Validated data accuracy and consistency across complex, large-scale transactional SQL datasets to ensure reliable business insights.

Loan Default Risk Prediction

Python, SQL, Scikit-learn, Pandas

- Extracted, cleaned, and validated data from over 50,000+ financial records, ensuring 100% data integrity for MIS reporting.
- Developed dynamic dashboards and performance scorecards to track loan default risk indicators and visualize key data trends.
- Collaborated with business stakeholders to gather reporting requirements, successfully translating complex data into actionable business insights.
- Automated routine data processing tasks using SQL and Python, reducing manual effort by 20% and improving overall reporting efficiency.
- Participated in weekly discussions with business partners to review data accuracy, address reporting gaps, and refine performance metrics.

AI-Powered Computer Vision Attendance System

Python, OpenCV, SQL

- Developed an automated attendance reporting solution in Python that increased log accuracy by 25%.
- Built performance dashboards to track attendance trends and visualize key system metrics using SQL.
- Designed robust data validation and exception handling workflows to ensure the integrity of 1,000+ student records.
- Implemented automated data extraction and validation scripts that decreased manual entry time by 15%.
- Collaborated with stakeholders to gather reporting requirements and refine project specifications for better business insights.
- Supported continuous improvement by updating documentation of reporting processes and maintaining high data quality standards.

EDUCATION

SASTRA Deemed University | B. Tech - Electronics and Communication Engineering | Oct 2021 - Sep 2025
Thanjavur, Tamil Nadu
